Assessment Implementation Procedure

1. Eligibility for assessment

Students are expected to actively engage in course learning activities. Failure to engage in assessment tasks that are integrated into learning activities (e.g. class discussion, presentations) will be reflected in the marks for these assessable activities. Failure to meet the specified attendance requirements of the course may result in course failure.

Students are expected to attempt all assessment requirements in a course. Failure to attempt an assessment task or tasks can only determine the overall course outcome proportionate to the weighting of the task or tasks. Exceptions to this procedure are tasks that assess learning outcomes that must be mastered in a course including competencies stipulated by accreditation bodies and Work Health Safety requirements - failure to attempt these tasks may result in course failure.

2. Examinations

An examination is any type of assessment that is conducted in a managed setting. Examinations include those organised centrally by the Examinations Team and those organised locally by faculties and schools.

2.1. All examinations

Examinations cannot be scheduled:

- In the final teaching week of a standard term or semester if it is worth more than 20% of the assessment in a course; or
- In the study break period.

Students will be informed of:

- The schedule and venue of examinations by accessing their examination timetable via myUNSW after the published release date; and
- Specific requirements for the examination and will be provided opportunities to familiarise themselves with specific equipment or resources prior to the examination.

If the examination cannot be held as scheduled because of unforeseen circumstances, the examination will be rescheduled within the designated examination period.

Students will normally be required to sit no more than two examinations in a day.
Students and relevant academic staff must ensure that they are available for the duration of the examination period.

At all stages in the preparation, administration and post-processing of examinations, all examination material, including electronic material, will be managed securely.

2.2. Central examinations

Deadlines for the administrative processing of central examinations, including centrally administered supplementary examinations, are set by the Examinations Team and circulated prior to the first week of a standard term or semester.

The central examination timetable will be developed with regard to the capacity of venues and class sizes. Wherever possible, examinations with large marking loads will be scheduled early in the examination period.

Faculties and schools will:

- Adhere to the specified timelines and processes for examinations administered by the Examinations Team; and
- Ensure appropriate academic staff are available at the time that examinations are scheduled.

The duration of a centrally administered examination is 2 hours.

A central examination period will not be held in the Summer Term from Summer 2019/2020 onwards in line with the changes to the Academic Calendar.

2.3. Local examinations

Local examinations scheduled during the examination period must be included on the central examination timetable. This includes assessments that are entirely delivered during the examination period at home or in other settings but not earlier assessments e.g. assignments that are only scheduled to be submitted during the examination period.

School managed examinations of durations other than 2 hours will be scheduled in the second week of the published examination period.

Faculties are responsible for the preparation, implementation and processing of local examinations ensuring the same standards of equity and security as central examinations.

2.4. Alternative examinations

Alternative examinations may need to be provided for students who are unable to attend the scheduled examination. An alternative examination may be the same examination but scheduled at a different time or, if this is not feasible, a different examination that is comparable in content and difficulty.

An examination may be rescheduled with the approval of the Examinations Team and the responsible academic member when:

- An alternative examination is recommended by the Disability Services Unit for a student with disabilities;
- A student has two centrally organised examinations scheduled at the same time;
- A student’s religious faith prohibits them from sitting an examination at the scheduled time; or
- A student in the Elite Athletes and Performers Support Program has sporting or performance commitments which conflict with a scheduled examination.

If a student requires a reschedule of an examination, they must complete a Special Consideration application in line with the published timeframes.

When the same examination is rescheduled for the morning or afternoon of the same day, students need to remain under supervision for the whole day. During this period, the student will not be permitted to use any electronic devices capable of transmission, including computers, mobile phones, tablets and smart watches.

3. Assessment tasks other than examinations

Course outlines will:

- Stipulate methods and deadlines for submission or completion of assessment tasks and penalties for late submission/completion including the deadline for absolute fail (i.e. after which the task will not be assessed); and
• Provide information on the process for requesting and approving extensions for submission or completion of assessment tasks.

Students are expected to manage their time to meet deadlines and to request extensions as early as possible before the deadline.

Except where the nature of an assessment task precludes its electronic submission, all assessments must be submitted to an electronic repository, approved by UNSW or the Faculty, for archiving and subsequent marking and analysis.

4. Educational adjustments

Educational adjustments involve making changes to a university work or study environment to ensure people with a disability have equal opportunity.

Students with disabilities may be eligible for reasonable adjustments to the requirements of an assessment, including an examination.

The Disability Services Unit will provide a Letter of Support for a registered student that will outline recommended adjustments. Academic staff or the Examinations Team will liaise directly with Disability Services Unit if the proposed adjustments are not considered reasonable.

The student is expected to meet the performance standards for the assessment with the application of reasonable adjustments.

5. Special Consideration

Special Consideration is the process for assessing and addressing the impact on students of short term events, beyond the control of the student, that affect performance in a specific assessment task or tasks.

5.1. Applications for Special Consideration

Applications for Special Consideration will be accepted in the following circumstances only:

• Where academic work has been hampered to a substantial degree by illness or other cause; and
• The circumstances are unexpected and beyond the student's control.

Except in unusual circumstances, the duration of circumstances impacting academic work must be more than 3 consecutive days, or a total of 5 days within the teaching period. The length of a deadline extension should normally be equivalent to the duration of circumstance.

Work commitments are not considered a justification for special consideration. Students cannot claim consideration for conditions or circumstances that are the consequences of their own actions or inactions.

An absence or inability to complete an assessment task within the required time must be supported by a medical certificate or other evidence that clearly indicates that the student was unable to comply. A student absent from an examination, or who attends an examination and wants to request special consideration, is normally required to provide a medical certificate dated the same day as the examination.

All applications and necessary documentation should normally be provided by the student to the University as soon as practicable after the problem occurs, and, at the latest, within three working days of the assessment or the period covered by the supporting documentation.

5.2. Outcomes of applications for Special Consideration

Special Consideration is primarily intended to provide an extra opportunity for students to demonstrate the level of performance of which they are capable. If Special Consideration is approved:

• Where feasible, a supplementary assessment will be offered to a student who failed the assessment task. This requirement is independent of the weighting of the assessment task; or
• Marks derived from other completed assessment tasks may be aggregated or averaged to achieve an overall mark; or
• The deadline for the assessment may be extended.

In the absence of additional assessment, there is no provision for a student's final mark in a course to be increased even if Special Consideration has been approved.
6. Supplementary assessment

The course outline will provide information on the availability, or otherwise, of supplementary assessments. In all cases, the form of the supplementary assessment need not be identical to the original assessment, but it must assess the same learning outcomes.

Supplementary assessment will be offered to any student who fails an assessment task if their request for Special Consideration for that task is approved. The mark awarded for the assessment task will be based solely on the supplementary assessment.

Where a student fails an assessment task in a course in the final term or semester of their program but does not have an approved Special Consideration for that task, supplementary assessment will still be offered in cases where passing the task would have resulted in the student passing the course and completing the program. This requirement does not apply to research- or project-based assessments and theses.

Schools may choose to offer supplementary assessments under other circumstances than those listed above.

The mark awarded for a supplementary assessment, in the absence of Special Consideration, will be capped, unless otherwise advised in the course outline or by school or faculty guidelines, as follows:

- Where a supplementary assessment is provided for a student who fails an assessment task in any course, the final mark awarded for the assessment task will be capped at 50%; or
- Where a supplementary assessment is provided to a student with a Fail based on the overall course result, the final mark for the course will be capped at 50%.

Where a supplementary examination has been offered and the student is unable to attend, one further opportunity to sit a supplementary examination may be offered. If the student is still unable to sit the second supplementary examination, then at the discretion of the Course Authority, either the marks derived from other completed assessment tasks may be aggregated or averaged to achieve a final mark (where all learning outcomes have been tested) or the achieved mark and grade will be finalised.

In exceptional cases, where a student is unable to sit both the final examination and the supplementary examination due to a documented medical condition or for other exceptional documented reasons, but has completed all other assessment tasks for the course, the student may be permitted to enrol in the course at the next opportunity on an auditing basis. In such a case the student will be permitted to sit the final examination and this mark will be added to the marks already achieved for the course. The final mark and grade will appear on the academic transcript for the first attempt at the course and the second attempt at the course will also appear on the transcript with a grade of AS.

7. Results

Marks/grades awarded for an assessment task are determined by the assessor of the task. If there is evidence of inconsistency in the marking of assessment tasks, the Course Authority will implement a process of moderation. A record of the raw marks/grades and any changes following moderation will be retained.

The determination of the composite course result must be based on the stated weighting of assessment tasks. A record of the determination of the composite course result, including the algorithm, will be retained. Marks/grades of component assessment tasks for individual students cannot be altered when determining the composite course results, unless Special Consideration applies.

Course results will be reviewed to identify systematic variation of results from past cohorts and with the current cohort’s performance, reflected by their WAM. The relevant Faculty Committee with responsibility for assessment will confirm the justification and process for changing all course results if an assessment task has performed poorly or standards have not been appropriately applied.

Course results will only be officially released to students after the review and finalisation of results by the relevant Faculty Committee with responsibility for assessment.

At all stages in the processing and reporting of results, all data will be managed securely.

Assessment products, including examination scripts (other than those returned to students), are to be retained in the School for a minimum of six months. Students should have access to their own products and be able to consult the Course Authority on their performance. Faculties may determine the conditions under which access may be granted.

Students will receive their final course results, by email and MyUNSW, at the end of each term or semester by the published deadline. Students who have an outstanding financial debt to the University will have their results withheld until the debt has been cleared by the student.
Any results not finalised by the published deadline will be converted to a course “Not Completed Grade (NC)”. This grade counts as a Fail in the calculation of academic standing.

A student may apply for a review of the result of an individual assessment task or the overall course result. The review may involve an administrative check or re-assessment. The application must be submitted no later than five working days after the return of the piece of work or in the case of an examination, no later than five working days from the date that results are released. If approved, a re-assessment of an assessment task will be undertaken by an alternative assessor. The review of result may lead to the mark going up or down or remaining unchanged. Re-enrolment should proceed on the basis that the result remains unchanged. Applications should usually be finalised within two weeks.

8. Recognising meritorious achievement

8.1. Bachelor Pass programs – Pass with Distinction

The award of Pass with Distinction provides formal recognition on the testamur and academic transcript of excellence in overall academic performance in undergraduate Bachelor Pass degree programs where an award with Honours is not available:

- Award with Distinction is awarded when a weighted average mark (WAM) of at least 75 has been achieved in all courses completed since enrolment at UNSW which are credited to the relevant award;
- Courses that have been failed will be included in the calculation of WAM;
- Courses completed on exchange or cross-institutionally will not be included in the calculation of WAM;
- The recognition of other specified levels of academic performance on the testamur for Pass degree programs is not permitted, specifically any award based on levels other than Distinction;
- WAM is not rounded up or down for the purposes of awarding distinction;
- To be eligible a student must have completed at least 50% of the requirements of their award through UNSW. Students who undertake courses under exchange or other overseas study arrangements will not be disadvantaged in determination of eligibility;
- Eligible students are identified by the Program Authority when checking students for graduation. Students do not need to apply for this award;
- It is expected that all eligible programs will award Pass with Distinction except in special circumstances where a program authority has the approval of Academic Board for a particular program to opt out.

8.2. Bachelor Honours programs

Honours can be awarded in the following classes: Class 1; Class 2, Division 1; Class 2, Division 2; and Class 3 (if appropriate). Program documentation will include the methodology for awarding Honours.

The determination of the class of award should be based on pre-defined academic standards. These standards and the criteria for the achievement of Honours in each of the classes should be explicitly stated in program rules.

Where the Honours program requires completion of an Honours thesis or research project, it must be marked by two examiners who are qualified to assess the work. Each examiner should make their initial assessment independently of each other.

Program Authorities will have documented processes and clear guidelines to review and moderate the final assessment marks and the classes of award.

8.2.1. Separate Year Honours Programs

For Separate Year Honours programs the calculation of class of award will be determined from the student’s weighted average mark (WAM) for all of the courses (research-based and coursework) required for the program. Only courses taken while enrolled in the Honours program, and specified in the program rules, may count towards the award class WAM.

8.2.2. Embedded Honours programs

Embedded Honours programs may use an approved weighted WAM calculation which reflects the relative importance of different components of the curriculum in the awarding of a class of Honours. Examples of this may include higher relative weightings for core, upper level, or research courses. This calculation needs to be approved as part of the program rules.
In cases where students meet progression requirements and program-level learning outcomes, and hence qualify for the Honours-level award, but do not meet the approved requirements for a class of Honours, a student's testamur and transcript will acknowledge Honours as part of the award name only.

Refer to the University Medal Policy for the awarding of the University Medal for outstanding academic performance by a student in an Honours program.

8.3. Masters (coursework) programs – Award with Excellence

The award of ‘with Excellence’ provides formal recognition on the testamur and academic transcript of outstanding performance in Masters (coursework) programs:

- Award with Excellence is awarded when an overall weighted average mark (WAM) of at least 80 has been achieved in all courses completed since enrolment at UNSW that are credited to the relevant award. These include courses from other UNSW programs of study for which credit has been granted and courses completed as part of a graduate certificate and/or graduate diploma that articulates to the masters;
- Courses that have been failed will also be included in the calculation of WAM;
- Courses completed on exchange or cross-institutionally will not be included in the calculation of WAM;
- The recognition of other specified levels of academic performance on the testamur for coursework masters awards is not permitted, specifically any award based on levels other than with Excellence;
- WAM is not rounded up or down for the purposes of awarding with Excellence;
- To be eligible a student must have completed at least 50% of the requirements of their award through UNSW. Students who undertake courses under exchange or other overseas study arrangements will not be disadvantaged in determination of eligibility;
- Eligible students are identified by the Program Authority when checking students for graduation. Students do not need to apply for this award;
- It is expected that all eligible programs will award ‘with Excellence’ except in special circumstances where a program authority has the approval of Academic Board for a particular program to opt out.

An award ‘with Excellence’ cannot be awarded for Graduate Certificate, Graduate Diploma or Masters (Extended) programs.

9. Roles and responsibilities related to assessment implementation

The Faculty Academic Committee, or equivalent, will be responsible for establishing a procedure for the governance of assessment outcomes including the approval of course results and academic progression. This responsibility may be delegated to an appropriately constituted committee to ensure the approval of course results and decisions related to progression are independent of the Course Authority.

The Course Convenor/Authority will be responsible for course assessments and will ensure that the following tasks are completed:

- Pre-determine the supplementary assessment to be provided for each assessment item in the event a student is granted Special Consideration;
- Preparation of examinations and assessors;
- Moderation (as required);
- Collation and reporting of assessment results; and review of results and organisation of feedback to students; and
- Tasks related to assessment design as listed in the Assessment Design Procedure.

Student Services & Systems will be responsible for:

- Assessing the eligibility of applications for Special Consideration and determination of outcome as agreed in consultation with the Course Authority;
- Setting and notification of processing deadlines;
- Ensuring that examination practices are transparent, fair and consistently applied;
- Providing resources to assist staff with the practice of managing School examinations;
- Managing Assessment Planning via myUNSW;
- Scheduling of the examination timetable for centrally and School managed exams;
- Coordinating examination paper submission for centrally managed exams;
- Recruitment, training, coordination and management of supervisors for centrally timetabled exams;
• Coordination and management of centrally timetabled exams for students registered with Disability Services Unit; and
• Security of examination papers once submitted.

For roles and responsibilities related to quality assurance and assessment design see the Assessment Design Procedure.

</tbody>
</table>
Assessment task
An assessment task refers to a specific activity relating to any method of assessment that requires students to demonstrate their learning towards an intended learning outcome.

Educational adjustments
Educational adjustments are measures or actions taken to assist a student with a disability to participate in education and training on the same basis as other students. Adjustments may be made in relation to teaching, learning and assessment that assist a student to access course content and assessments.

Learning outcomes
Learning outcomes describe the knowledge, skills and capabilities that students are expected to develop during a course or program of study.

Moderation
Moderation is a quality assurance process that is used to check that assessment practices are applied equitably to all students in the same program or course. Moderation includes processes put in place prior to marking and grading to ensure assessors understand assessment criteria and performance standards, and those put in place subsequently to ensure consistency in their application. Moderation ensures that marks or grades are awarded appropriately and consistently.

Performance standards
Performance standards describe different levels of learning achievement in relation to learning outcomes.

Special Consideration
Special Consideration is the process for assessing and addressing the impact on students of short term events, beyond the control of the student, that affect performance in a specific assessment task or tasks.

Standards based assessment
Standards-based assessment is the judgement and reporting of student learning achievement based on predefined learning outcomes and performance standards. Standards-based assessment can apply at the level of the program, course or assessment task.

Supplementary assessment
A supplementary assessment is an additional assessment (resit) that is provided to a student who has failed or was unable to complete an initial assessment.
